PROFESSIONAL SUMMARY

Computer Science graduate (Kasetsart University, 2026) with hands-on experience in machine learning, computer vision, and AI pipeline development. Proficient in Python, TensorFlow, and cloud platforms (AWS, GCP, Azure). Built and deployed an end-to-end AI-powered mobile application integrating Generative AI APIs. Seeking an AI Engineer role to design, train, and deploy intelligent systems at scale.

TECHNICAL SKILLS

- **AI / ML:** TensorFlow, Keras, MobileNetV2, Generative AI APIs, Scikit-learn, Computer Vision, Predictive Modeling
- **Languages:** Python (primary), SQL, Java, C/C++, PHP
- **Cloud & MLOps:** AWS, GCP, Azure (Azure for Data Engineer certified), Apache Spark, Docker (familiar)
- **Data & BI:** Machine Learning, Statistical Modeling, Data Mining, Big Data, Power BI, SQL Server
- **Dev Tools:** PyCharm, Git, Next.js, VS Code

PROJECT EXPERIENCE

AI-Powered Mobile App for Food Recognition | Senior Project

- Designed and implemented a two-step AI pipeline using Python, TensorFlow, and Keras to classify images and detect food subjects with high accuracy.
- Integrated Generative AI APIs (LLM-based) to identify specific dishes from filtered images, boosting recognition precision.
- Managed the full ML lifecycle: data collection & preprocessing, model training (MobileNetV2 transfer learning), evaluation, and mobile app deployment.

INTERNSHIP EXPERIENCE

May - Oct 2025

Full-stack Developer & Software Tester | Alstorm

- Developed and integrated frontend and backend features, collaborating in an Agile development environment.
- Conducted systematic testing (functional & regression) to ensure software quality before production release.

EDUCATION

June 2022 – April 2026

B.Sc. Computer Science | Kasetsart University Sriracha Campus

GPAX: 2.85

TRAINING & CERTIFICATIONS

- **2026:** KU AI Pioneers: Forward Challenge
- **2024:** Next.js Training Skills, Azure for Data Engineer, Cloud Computing Skills, Web Application Design, Network Cabling for Engineering by LINK.
- **2023:** AI for Digital, Power BI: Unlocking Insights, KU Digital Literacy, ChatGPT, and AI for Digital Students.
